

How to Select the Right Tree

Learn to select the right species, right location and right purpose when planting a tree to ensure it will thrive for a lifetime.

FREE PRESENTATION

“Location, Location, Location” is the mantra when buying a house. When planting a tree, it is “Right Tree, Right Place, Right Purpose.”

This free presentation will cover what goes into selecting a tree from analyzing the site, determining what tree will thrive where, what to look for and ask when purchasing from a nursery or big box store, to a discussion on new varieties on the market and the tried and true species. The native vs. non-native issue will be discussed along with the need for diversity in both age and species.

The presentation will be led by Scott Van Wyk, an ISA Certified Arborist and ISA Tree Risk Assessment Qualified Arborist (TRAQ). Scott is currently an arborist representative for Bartlett Tree Experts in Grand Rapids and has worked in the tree care profession since 1984.

ISA CEU approved.
