

# Tree Risk: It's Real and Requires Assessment

FREE WEBINAR

**As essential as trees are to our well being, they can injure people and property. Proper maintenance and inspection is critical.**

Kay Sicheneder, is chief consulting arborist and plant health care manager for Owen Tree Service. In her thirty year career she has worked with pesticide applicator certification, and was Forestry Supervisor at Ann Arbor for 8 years. Her presentation will identify the common defects in trees that compromise their structural integrity and discuss measures to prevent and manage structural weakness.

Topics to include:

- Defining tree risk assessment
- What makes a tree risky?
- Identifying structural defects in trees
- Categorizing & prioritizing tree risk
- Mitigating tree risk

**\*\*ISA and SAF credits approved\*\***
