

ReLeaf Michigan

Planting Trees, Growing Communities

Benefits of an Urban Tree Canopy

Learn how trees improve the quality of life and overall well being in Royal Oak and what you can do to help keep our trees - and all of us as a result - healthy and thriving. Led by Bill Lawrence, president of ReLeaf Michigan and retired Ann Arbor city forester, this free presentation will cover the basics of why a tree canopy is so important, outlining the quantifiable benefits trees provide to a community. Trees affect our environment, energy bills, economy, and even the value of our homes. You'll also learn why planting trees of diverse species will support a healthy community forest that will live for generations to come.

Royal Oak Public Library,
222 E. Eleven Mile Rd.,
Royal Oak 48067

Thursday, February 1
7:30PM - 8:30PM
